

Head of HealthCare

At KSV, our aim is to concentrate on the improvement of the immune system of our children and to cure them with natural remedies. Prevention is better than cure.

The head of healthcare monitors the children daily, in the morning and evening. She also ensures that the children who need medical follow-up or some treatment (cleaning of wounds, giving medicines, etc.) is done, with the help of the wardens. It also involves maintaining the medical files of the children on the computer in order to have a better knowledge of the health condition of each child, and to make web based research to collect information about any possible problems you could face. If there is a doubt about a diagnosis, the person has to go to the hospital in Dharwad with the child. Some visits to the dentist also have to be done.

It would be much appreciated that the person facilitates some workshops for the children about health, hygiene and the human body.

KSV is just like a big family, which means that apart from the children, the head of healthcare should also look after the health and well-being of the volunteers and workers in the school.

Tasks

- * Monitoring the children twice a day (morning and evening),
- * Giving daily medication and other treatments,
- * Maintaining the medical files of the children,
- * Taking the children to a hospital when needed,
- * Keeping the “bobo house” (infirmary) in a clean and hygienic state.

Competences and qualities

- * Basic knowledge and experience about healthcare and first aid are desired,
- * Sweetness, listening and communication skills,
- * Patience,
- * Curiosity,
- * Meticulousness and organizational capacities,
- * Taking initiatives,
- * Being open-minded regarding alternative medicine,
- * Interest in the growth and well-being of the children.

Being the head of healthcare at KSV is a very enriching experience for people who are interested in basic healthcare. It is also an opportunity to develop your leadership and social skills.
