

MINI-CONYNE

By M.Mula

Controventatura del bordo d'entrata delle cellule
(facoltativa ma consigliata)

Carta velina, 10X80 mm

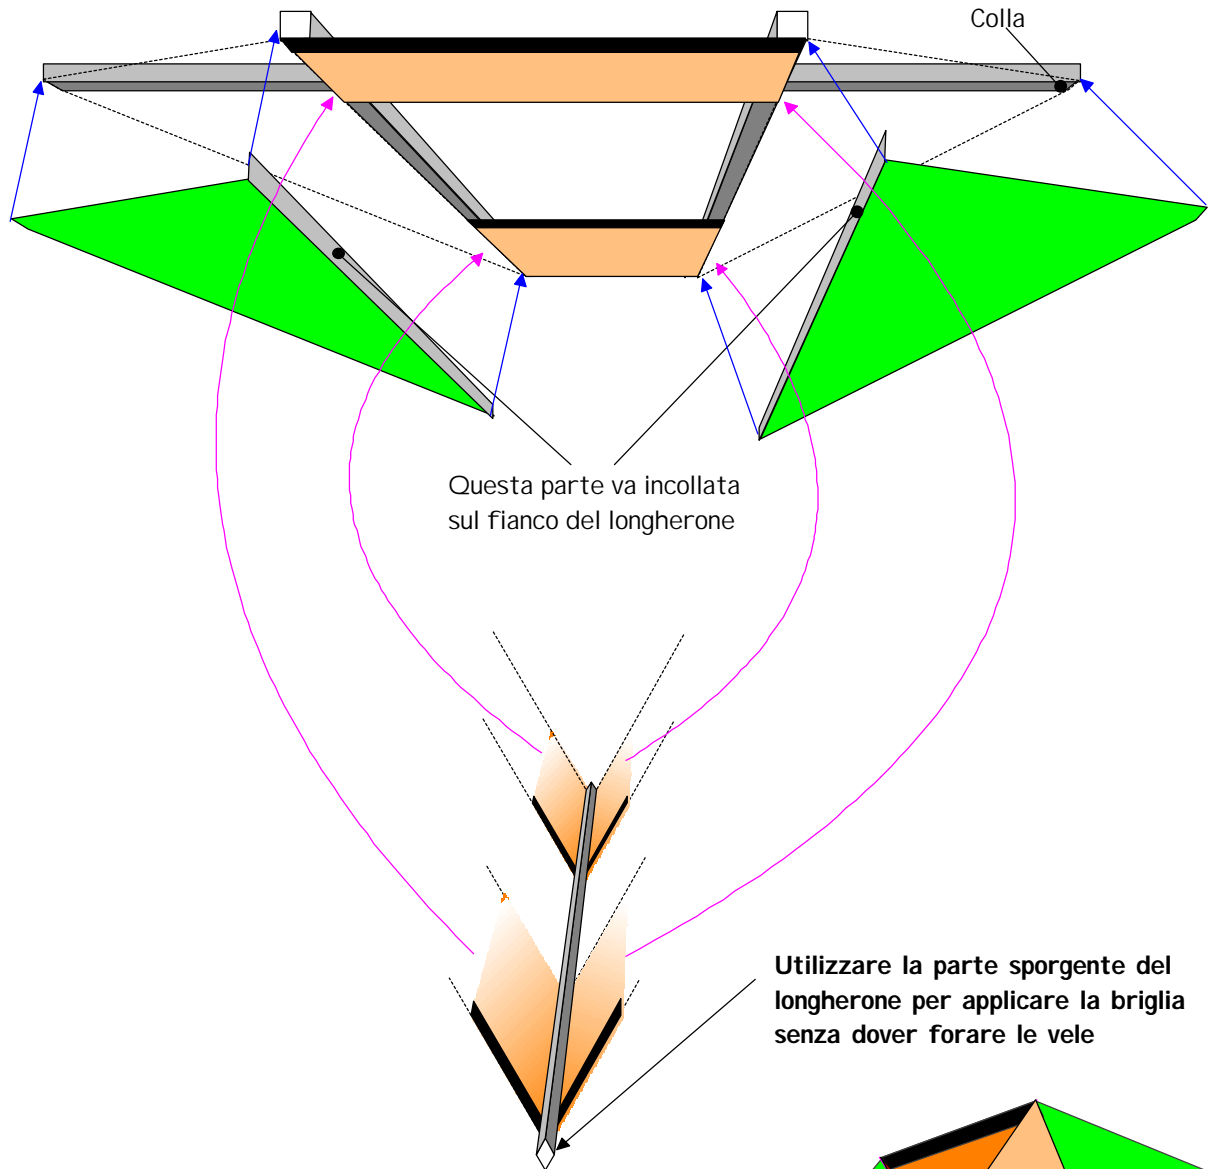

LEGENDA

-  Listello in balsa, sez. 4 X 4 mm
-  Bordo libero dela vela

REALIZZAZIONE DELLA VELATURA

- Applicare ai longheroni le vele superiori delle cellule;
- Applicare le altre vele delle cellule al longherone inferiore;
- Completare le cellule incollando le estremità delle vele sul fianco dei longheroni superiori;
- Applicare per ultime le ali, come mostrato in figura.

La briglia va posizionata sul longherone inferiore, come indicato di fianco.
