CALL FOR PAPERS

"Longevity Risk, Differential Mortality, and Lifetime Inequality"

BRESCIA, SEPTEMBER 28 -29 2018

UNIVERSITY OF BRESCIA

Workshop Description

The workshop aims at bringing together a group of researchers that use dynamic models, decision theory under uncertainty, and partial or general equilibrium analysis for studying the problems related to longevity risk, differential mortality and lifetime inequality.

Thus, we solicit both theoretical and applied contributions addressing issues related to:

- longevity risk measurement and management
- mortality risk measurement and management
- affordability of pension schemes
- risk management for pension funds
- optimal pension time
- differences in mortality rates: description, forecasting, risk management
- best forecasting models for future actuarial measures
- sources of lifetime inequalities: description, forecasting, risk management
