

UFO Sezione Ufologica Triestina

Casistica: origin or source of the documents of UFO casuistry and synthetic analysis of data. Implications and perspectives. D5 luciano.perla@tin.it

Italian case: 13.000 wedges
Global case studies: 1.200.000 reports
Approximate data

Main findings and / or test objective

- Data radar-visual**: Radar surveys for made land airplanes, with which you can go dak to speed, distance, altitude, and dimesions of these object.
- Physical data objective**: For example: traces or imprints left by these objects in the soli (from which we can trace the weight of these objects), effects of eletromagentic interference.
- Foto and video**: Photo and videos taken in all the countries of the planet.

The UFO question must compare with the themes of the current dimension sociocultural of the our civilization (?).

UFOs and istitutions scientific

- 1) UFOs do not represent directly and properly scientific question give that they are outside the common context di "phenomenon", because technological artefacts.
- 2) No one has ever been made organic and systematic research on the UFOs by the community international scientific. In view the position of science toward hin UFO results to the position arbitrary of individual researchers.

The implications of the question UFOs do not ax time that they find. They are configured as epocal turning point for ours culture and our civilization. A copparison with the reality a regardless of specifications prerogatives, could to represent a shock cultural for our current civilization.
